Alterna-Care
HOME HEALTH AGENCY

We treat
everyone
the same.

Like family.

Distinctive. Our relationships, our personality, our spirit. Our care giving and receiving needs are as unique as we are.

Compassionate care in familiar surroundings speeds the healing process. Our services enable people to remain in their homes for recuperation or therapy.

A physician may recommend a period of home care following a hospital stay. Alterna-Care can provide licensed and certified professional medical care and personal assistance.

Founded by nurses and family owned and operated, we invite you to call us to discuss your unique needs.

Our staff will work closely with your physician to provide a comprehensive home health plan.

Nursing Care

Medicare-approved intermittent skilled nursing visits can be arranged in your home, when ordered by your physician. We provide 24-hour on-call service.

Rehabilitation

Our licensed physical and occupational therapists and speech pathologists administer professional therapy.

Disease Management

We offer care for patients with cardiac, diabetes, psychiatric, or orthopedic diagnoses, as well as wound management.

Social Workers

Our team can work with you to obtain access to transportation, meal programs, counseling and other community services that provide valuable support to the patient and their family.

Personal Care

Our home health aides can assist with daily bathing, grooming and personal hygiene needs.

Monitoring

As the exclusive provider for Honeywell HomMed™ monitors, we can provide daily vital sign and medication reminders around the clock. This state-of-the-art system communicates patient data to our clinical station, the data is then reviewed by a registered nurse, who is able to provide that information to your physician.
